PRELIMINARY AMENDMENT

Hon. Commissioner of Patents

Washington, D.C. 20231

Sir:

Prior to initial examination on the merits, please amend the above-identified application as follows:

IN THE CLAIMS:

Please enter the following amended claims 1-10:

1. (Amended) A method for selecting a modulation detector in a receiver which includes at least a first and a second detector, the method comprising:

determining at least one cross-correlation value between a stored training sequence and at least one training sequence of a received signal; and

selecting a detector used for detection of a signal to be received on the basis of the determined at least one cross-correlation value.

2. (Amended) The method of claim 1, wherein determining at least one cross-correlation value further comprises:

searching for an ideal synchronization point of the received signal, at which point the cross-correlation between the training sequence of the received signal and the stored training sequence has a maximum value; and
